

Deep Watering Kit: Help your trees grow tall!

The Deep Watering Kit is designed to water your trees and shrubs at the root zone where it is most effective. It is ideal for plants where access to water is difficult, and is commonly used by Councils for watering in nature strips.

Features and Benefits:

- Releases water slowly to the roots of shrubs and plants, ensuring they get adequate watering even where access is prevented by borders or paving.
- Gives trees a good start. Makes trees and shrubs easy to water, even when they are located in distant or difficult to irrigate locations, such as nature strips.
- The End Grate feature has been introduced to Council tankers and recycled water trucks to water trees easily. The truck simply hangs its hose into the grate as it drives past in order to fill each outlet.

Generous lip to locate hose end.

Barbs fit inside the corrugated pipe for tidy presentation.

Grate deters insects and small animals from entering the pipe.
