

NELSON®

RAIN-TRIP™ Rain Sensor

To avoid unnecessary watering, Nelson now offers the 8501 Rain-Trip™ Rain Sensor. Compatible with most popular controller brands (normally-open or normally-closed hookups), the unit can be mounted to the side of a structure using the bracket mount or, remove the bracket and the unit is ready for 1/2" conduit/pipe threading located at the bottom of the housing. It adjusts easily through settings ranging from 1/8" to 1" of rainfall. In addition, it comes with 25 feet of hookup wire for easy connection to the controller. Designed to be used with low voltage systems only (24V AC), the 8501 is a perfect solution for a variety of applications.

Specifications

24V AC (low voltage) use only
Height: 3.25"
Length: 5.75"
Weight with wire: 7.5 ounces

Adjustment settings:
